

First Chronic Disease Update, July 3rd 2018

Translational research is an important corner stone for NUTRIM. It is therefore important for basic scientists and physicians to meet and discuss scientific problems and relevant questions that they encounter. To facilitate this discussion, NUTRIM introduces a new annual thematic meeting: The Chronic Disease Updates. The theme of our first meeting is: *Personalized medicine or one size fits all?*

Registration deadline June 22nd.

'Personalized medicine' is one of the 25 research themes of the National Science Agenda (NWA). The NWA is an inspiration for everyone who is interested in science! Almost 12,000 questions that were posed by the Dutch population were summarized in 140 cluster questions. With the help of experts from knowledge institutions, social organisations and the business community, these questions were then elaborated in 25 researchable themes, including *Personalized medicine*.

For more information on the NWA, please visit: <https://wetenschapsagenda.nl/>(website in Dutch)

Preliminary Programme:

14.30 – 15.00 welcome with coffee and vlaai

15.00 – 15.15 Opening and Objectives

Annemie Schols

Clinical Perspective

15.15 – 15.35 Personalized medicine in chronic lung disorders

Frits Franssen

15.35 – 15.55 Personalized medicine and kidney failure

Jeroen Kooman

15.55 – 16.15 Personalized medicine for type II Diabetes patients

Bas Havekes

A research Perspective

16.15 – 16.45 Minimally invasive diagnostics and early detection
Boots

Vera Schrauwen & Agnes

Short break 15'

Round table discussion and pitches

17.00 -17.30 Round table discussion

All speakers & Audience

Date: Tuesday 3rd July 2018

Location: Groene zaal, Universiteitssingel 50

Time: 15.00 – 17.30 hours

Registration: Send an email before 22nd June to secretariaat-nutrim@maastrichtuniversity.nl
